MIXED BED RESIN

Aquatrol MB6040SG Mixed Bed Resin

is a semi-conductor grade ion exchange mixed bed resin which has been designed for numerous applications, including final polishing in the highest purity water treatment applications.

Aquatrol MB6040SG Mixed Bed Resin

is a pre-mixed resin product composed of an equivalent mixture of high capacity, fully regenerated strong acid, and strong base gel type ion exchange resins.

The Aquatrol MB6040SG Mixed Bed Resin

mixture exhibits no clumping and ensures perfect mixed bed equilibrium performance. The uniform particle size of the resins maximizes the kinetic performance of the mixed bed allow the use of high service flow rates to achieve the most effective balance of pressure drop and purity, characteristics which are essential to produce water of the highest achievable purity with a minimum volume of rinse water.
